

**IP Based CCTV
solution for BPCL HO
at Ballard Estate.**

*BPCL Required HD
resolution IP Based CCTV
Cameras in their Corporate
office*

The Challenge

✚ **BPCL** wanted surveillance Solution for their Corporate office as Ballard estate

In continuation they were looking for 24*7 Monitoring of their Office operation, Monitoring of lobby, passage and other important locations like perimeter, Gate 7 Parking area and wanted **Cosmos Group to provide a full proof security solution to safeguard their Property and assets.**

In addition they also wanted to monitor all 3 buildings Camera at one of the buildings.

The Solution

The Professional Services Group at Cosmos carefully evaluated the BPCL team's requirements and recommended a solution that could meet their needs.

The Solution we designed for surveillance was for 80 cameras which was spread out at 3 buildings at Ballard East, The cameras shall be locally archived in Main Control Room for 30 days, The NVR is placed at one of the buildings. All these NVR's were then connected to the network using Optical Fibre so that all cameras can be viewed from a single location by multiple users. We also helped them to design the network infrastructure required to complete the system.

We also provided static IP so that all cameras can be viewed from Remote Location.

The Result

The seamless Surveillance solution created for BPCL creates high level security which was well appreciated by Security Personnel and also helped the administration department to keep close monitoring in terms of security and any other theft related issues.

“Cosmos has designed a solution that meets our security concerns and simultaneously matching BPCL’s expectations on service”
